The Flying Cruisers – Natural Pain Killer

The Flying Cruisers are an Alternative Pop/Rock band from Riverside, California. The four piece group formed about four years ago. Fronted by lead vocalist Ana Kreimeyer with Justin Waterman (guitar), Morgan Waterman (drums) and Carlos Garcia (bass), their upbeat groove has struck a chord with fans in their community. Known for energetic performances they have solidified their reputation as a top-notch live band. As such, for the past three years they have been asked to play at Downtown Riverside’s popular “[Festival of Lights](#)” annual event.

The band recently dropped their first single since 2019’s “Stalker Song.” Released January 15, 2021, “Natural Pain Killer” is an excellent example of The Flying Cruisers’ energetic yet Soft Rock sound. With a funky bass and drum rhythm, jangly guitars and Ana’s smooth and easy vocal, the song brings to mind some of the great female fronted Alternative bands from the 90’s. Like the Sundays or The Cardigans before them, they pair breezy lighthearted lyrics with a great groove.

Currently in the studio working on their debut EP, The Flying Cruisers have big plans for the future. The hometown heroes have taken their first step toward bringing their infectious vibe to the rest of the world. Check out “Natural Pain Killer,” below. You can also hear the song on the [Deep Indie Dive](#) playlist. Follow the links below the video to connect with The Flying Cruisers. Get on their socials and get in the loop on all of the current and future projects from this exciting young band.
